UTAH MUST BACK USING UP COPPER UP JOHN DERN

New President of Mining Congress Expects Local Mining Men to Assist Him.

SHOULD RALLY TO CONGRESS BANNER

Session at Los Angeles Just
Closed Brought All Industry Together.

doint Dern, newly elected president of the American Mining congress, has returned to his home in this city. He report transactions being the close relations established between the precious metal mining industry and the coai and off brunches. A representative from the little being congress, while the loss of the most information of the Titune work of the coai and off brunches. A representative from the little being congress, and only brunches. A representative from the little being congress, and only brunches. A representative from the little being congress, and only private the control, while the coai and off brunches. A representative from the little being congress, and only private the control, while the coai and off the coai and of the coai and off the coai and of the coai and off the coai and of the coai and off the coai and of

mining men generally certainty could not do better than to come to the front and help."

Mr. Dern states that the congress took some action in the matter of determining upon the proper place for the permanent home of the congress. The present home is in Denver, and a resolution was presented by Col. George W. E. Dorsey and Mr. Dern authorizing the directors to take up the matter with Denver of providing the facilities, etc., for the congress, which Denver promised. Denver will be reminded of its pledges and duty in the premises, and unless these promises are met the directors are empowered to take up with other sections or cities the question of establishing conscess headquarters elsewhere.

The selection of the next annual meeting point lies with the directors, and this matter will be determined between now and the first of the year. Douglas, Ariz, has asked for the honor, offering extended hespitality for the occasion. Douglas has desired the congress for some time. Other cities will be given consideration in this connection.

I cannot say too much in behalf of the city of Los Angeles and its citizens for the splendid hospitality extended to us, said Mr. Dern. "This hospitality was extended by the Sierra Madre club, the Chamber of Commerce and the representatives of the oil interests in the most open-handed manner imaginable. The ladies of Los Angeles also placed the risitors under great obligations, taking citire of the visiting ladies and seeing to all their wants."

OUTPUT OF ALASKA CONSIDERABLY REDUCED

SEATTLE Wash. Oct. 3.—The first estimate of the season's gold output from Maska, made by the Alaska-Yukon Magazine, anticipater a reduction of more than \$50,000,000 from last year's output of \$20,500,000. The estimate is \$15,000,000. The chief falling off is in the Fairbanks district, where there has been a dry season and where the beginning of diredge mining on the low grade ground has not yet commenced. A considerable forease of the Nome output is anticipated also. The output by districts, as stimated, follows:

Fairbanks district, \$5,000,000: southwestern Alaska, including the Treadwell, \$4,200,000; Nome and Seward peninsula, \$1,000,000; Nome and Seward peninsula, \$1,000,000; Iditarod, \$500,000; Kobukuk-Neatak, \$200,000; Koyukuk, \$200,000; Kuskokwim and remainder of Yukon valley, \$200,000; Kenai peninsula and Susitna basim, \$400,000; Prince William sound, \$100,000; Copper valley and Nizina, \$100,000, coast placers and miscellaneous, \$100,000. Total, \$15,000,000.

BINGHAM PORPHYRY ORE DEPOSITS ARE UNIFORM

One unexpected development at the Chino Copper property in New Mexico is the discovery of extremely high-grade zones of copper ore in the main body of lower grade, something that is seldom if ever met with in mining on a gigantic scale in Bingham. The Utah Copper company, for instance, has at its disposal a gigantic deposit of porphyry ores of a uniform grade, having in deed as well as in name a disseminated miningilization. The company does not bank an securing rich pockets, at least to the extent that they can be mined with steam shovels while at the Chino there are zones of high-grade straight smelting rock that can be mined by the shovel method. This fact, and the additional last that the Chino company has been forced to alter its original plans, doing steam shovel mining for years where some underground operations originally were evidently essential, have given Chino the right of way on the oastern markets, providing a feature in an otherwise featureless market.

ANNUAL REPORT CON. MERCUR

Disappointing Year Closed by Veteran Profit-Maker of Mercur Camp.

President Dern Does Not Expect Any Better Results

This Year.

The annual report of the Consolidated Mercur Gold Mines company was being mailed Monday to stockholders. The condition of this well known old dividend producer of the Mercur district is well summed up in the report of President John Dern, while the details of the mine and mill are entered into in considerable detail by General Manager George H. Dern. President Dern's report in part

The results for the year are not particularly gratifying, the net earnings being only \$16,537.08, and it has taken exceedingly hard and careful work to make any money at all. Indeed, several months of the year showed a net loss.

months of the year showed a net loss. We are operating on so close a margin that it is a constant worry to know whether we are gaming or losing. Slight mishaps or interruptions that would scarcely be worthy of mention under more favorable general conditions now serve to throw our results from the profit to the loss column.

The reason for this precarious conditions lies in the fact that our ore continues to get lower grade. It is true that the average for the year covered by this report is one cent higher than for the preceding year, but this was only brought about by reducing the tonnage it was hoped that by cutting the tonnage the average value of the ore could be raised sufficiently to increase the profits. By this means the ore values were held up to last year's results, but we treated 50,000 tons less, hence the gross production and the net carning both decreased.

The expenses were only one cent per form more than for the preceding year.

The expenses were only one cent per ton more than for the preceding year, which is considered creditable in view of the reduced tonnage, and an increase of 5 per cent in the proportion of base ore treated.

The extraction was not quite as good

of 5 per cent in the proportion of base ore treated.

The extraction was not quite as good as last year. The increase in the tailing loss is chiefly due to the oxidized ore from the Brickyard mine, which is very much harder than any ore ever heretofore encountered in our mines, and on which, even in the laboratory, it is impossible to get such low tailings as are usually obtainable on Mercur ore. Another factor was the exceptionally cold weather last December and January, which repeatedly froze up the mill to such an extent that it was almost impossible to keep running at all, to say nothing of getting satisfactory results. Prospecting has been energetically kept up during the year, as is apparent from the statement that over \$17,000 was expended in new work of this character. I stated last year that we had a good deal of promising territory that we intended to test. This referred particularly to the Apex and Magazine velns of the Golden Gate mine, and the Magazine veln south of the fault in the Brickyard mine. We had strong hopes for these places, and were deeply disappointed when no ore was found in them.

On account of the disappointing de-

them.
On account of the disappointing developments, and the constant tendency of the ore to get lower grade. I regret that I have no sufficient reason to hold out any encouragement for improved results during the ensuing year.
During the year the company suffered the loss of a member of its board of directors, Mr. Edward H. Airis, who died on May 23, 1919. In recognition of Mr. Airis's valuable services and in token of the high regard in which he was held, the board of directors on June 4.

L. McGee announces that he has d the exclusi e agency for the famous Knickerbocker spray brush, the Bath de Luxe, and will be pleased to have a demonstrator call at your con-venience. Telephones 2675. Sales depot, 218 Main. .35

PRICES ARE REACHED SOUTH UTAH CALLS ANNUAL MEETING

profit.

"However, the property new has been thoroughly overhauled and the mill remodeled, and it is expected that cheap mining will be done and a high extraction made. Recent developments underground have been very good and considerable ore, assaying 5 per cent, encountered. Also developments have been furorable in the low-grade ore badies, which have increased somewhat that tomage."

COAL STATISTICS OF AMERICA AND EUROPE

WASHINGTON. Oct. 3.—From figures on the world's coal supply in a recent British publication, the bureau of manufactures of the department of commerce and labor has compiled statistics showing that the United States, with 690 433 persons employed in mining coal in 1908, produced 126,562,000 tons of roal more than were produced by 965,264 persons similarly employed in the United Kingdom and that the production of coal in the United States amounted to 538 tons per person employed as against 171 tons produced per person in the United Kingdom.

dom.

Based upon reports of 1998 and 1993 the total production of coal in the United Kingdom, the United States, Russia. Sweden, Germany, Belgium, France Spain, Austria, Hungary and Japan for 1999 was estimated at 258,674,900 tons, with a total value at the pit of \$1,854, 228,855, and an average value per ton of \$1.92. The number of persons employed in producing the coal was 3,172,110 and the average number of tons per person produced 294. In regard to the coal consumption of the several countries the report says:

sumption of the several countries the report says:

"The consumption of coal in the United States is more their twice as great as that in any other country and nearly equal the combined consumption of the United Kingdom, Germany, France and Belgium and is actually greater per capits than in the United Kingdom."

MANAGER M'INTOSH OF OHIO EN ROUTE EAST

Colin Melatosh, general manager of the Ohio Copper company, is en route east. As far as can be ascertained, Mr. Melatosh did not take anyone into his confidence regarding the import of this journey, but there is an impression pre-vailing in certain circles that he intends shortly to resign from the management

and take the rest which is and which will terminate in tively identifying himself will per industry for which his and ability are see well demo. There are others of his frever, and they are by far in ity, who deny most positively his intention to resign new time until he can call his to finished. They point out the concentrator is only one-half sand that McIntosh deems it well as pride to stick to his the plant is handling its form. They believe his present miss in line with furnishing the equity of the work, for it has been stively by Heinze himself the pany is financed to the extening the mill to be completed of this wide of the matter it that it is considered a heat hat McIntosh will not sever tion with the company until brought to its highest point of Steckholders have every concentrate development for the to resign at this time.
